## SUMMARY

College student with experience in Java, C++, Python, etc.

## PROJECTS

### IGETC calculator— Programmer

June 2019- December 2020

I am working on an initiative to develop an IGETC calculator that benefits Ohlone Community College students. IGETC is The Intersegmental General Education Transfer Curriculum, used as a guide for transfer students in order to transfer successfully and on time. The calculator is designed to make the transfer process efficient and easier for the students. This calculator lets students input their class schedule and then calculates whether or not the sections are met and what classes students need to take in order to transfer successfully.

## EDUCATION

### American High School, 36300 Fremont Blvd, Fremont, CA 94536 — *Diploma*

August 2015 - June 2019

### Ohlone Community College, 43600 Mission Blvd, Fremont, CA 94539 — *in progress*

August 2018 - June 2021

I was part of Ohlone College Connections, which is a dual enrollment program for high school seniors in Ohlone Community College, Fremont. I am currently continuing my education at Ohlone Community College as a sophomore to transfer to a 4-year university.
